

Download current version of XAMPP from <http://sourceforge.net/projects/xampp/>

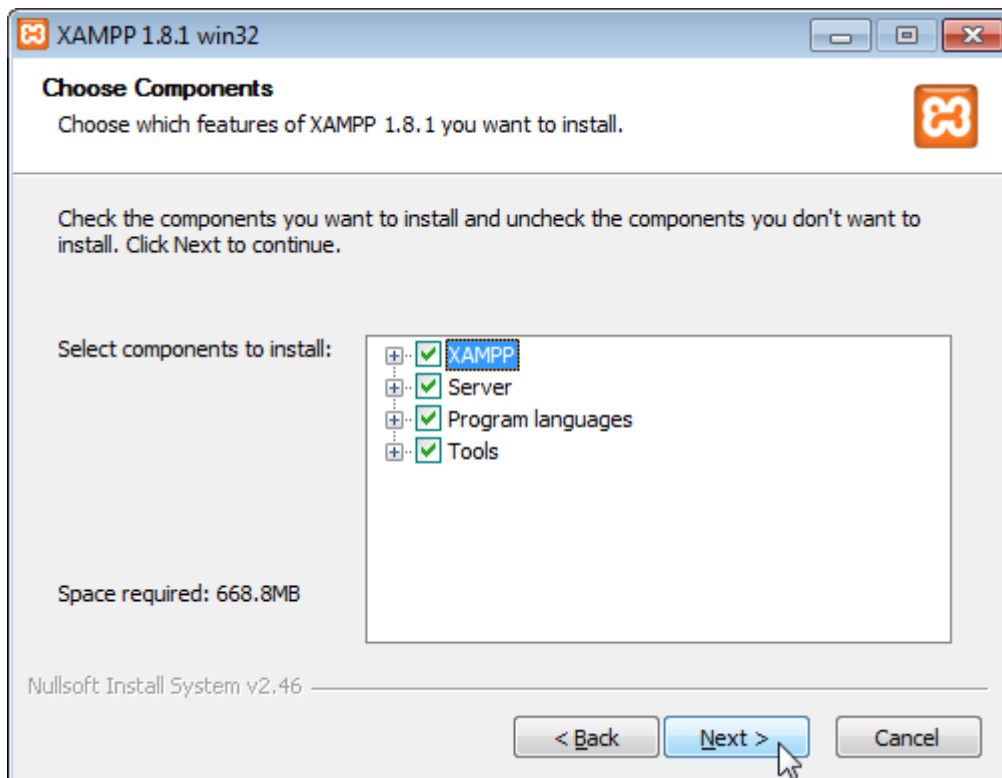

Start downloaded Installer and follow instruction

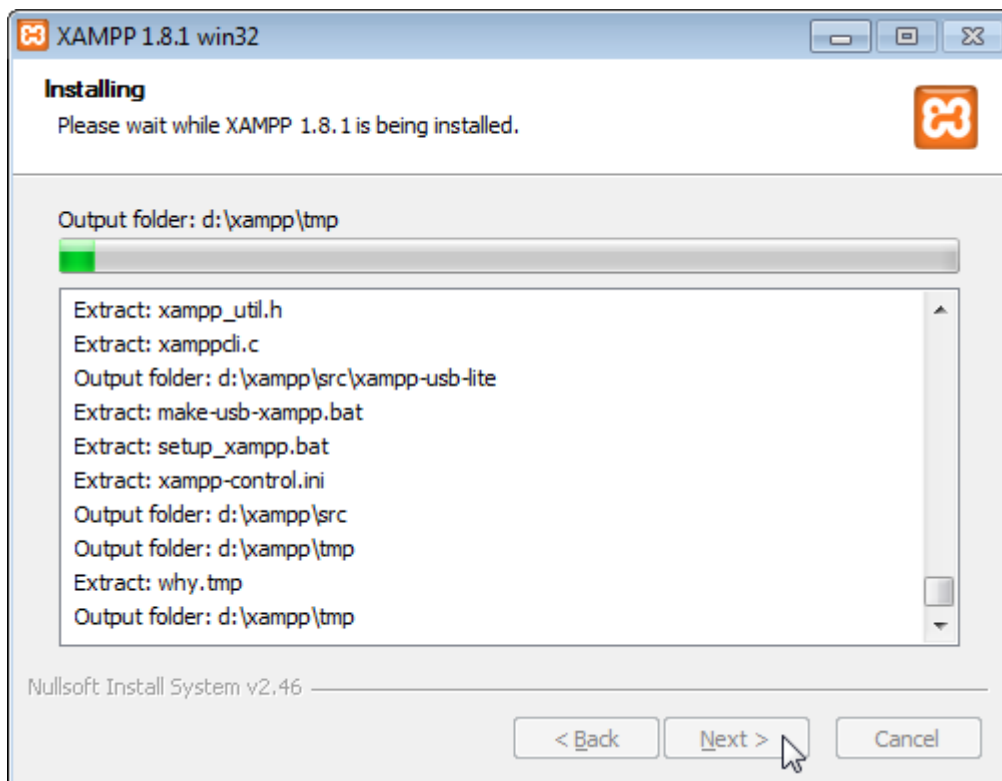

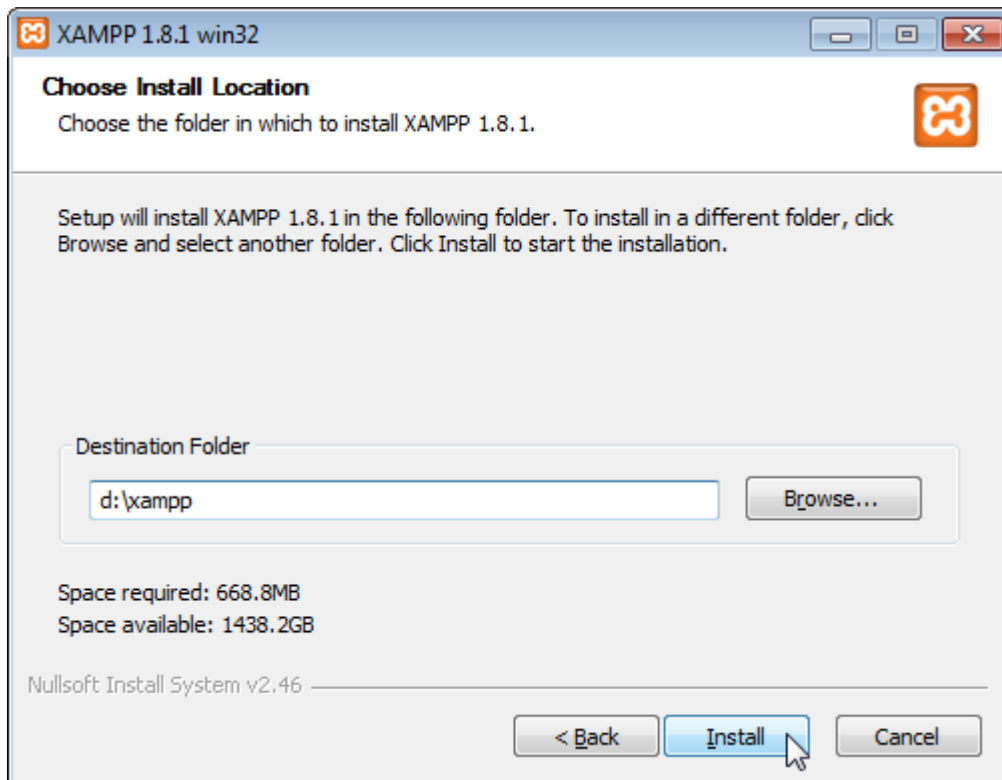

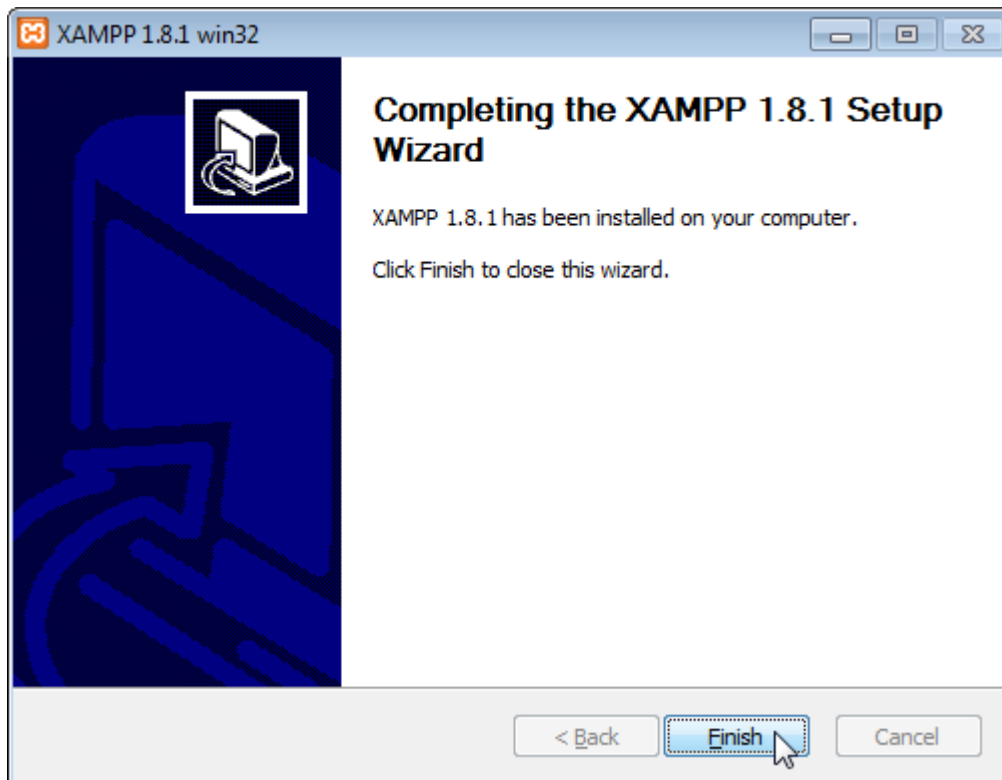

following alert window appears not on all machines!

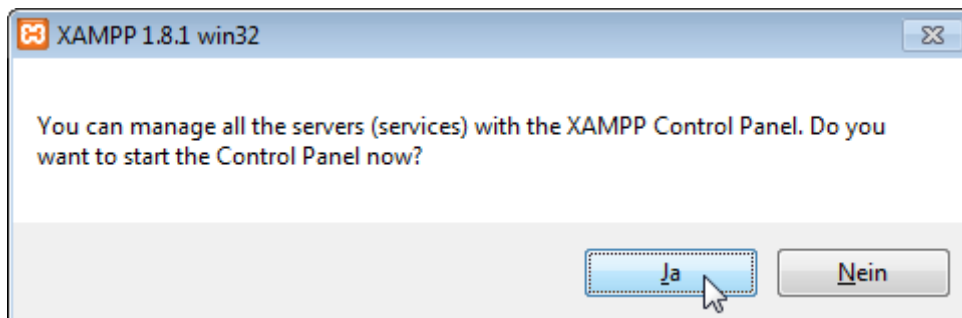

Choose a local folder on the fastest drive of you machine for instlling XAMPP to it.

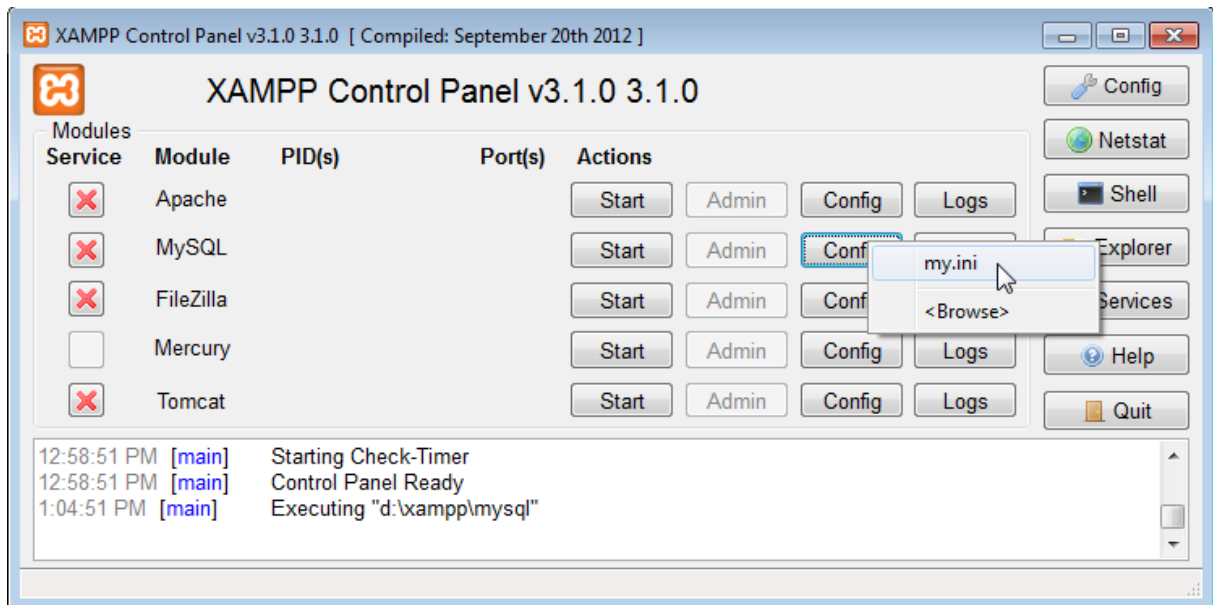

After finishing installation process select Yes from appearing dialog.

or manually start XAMPP Control Panel from XAMPP program folder

On the XAMPP Control Panel window, click config button for MySQL and choose my.ini

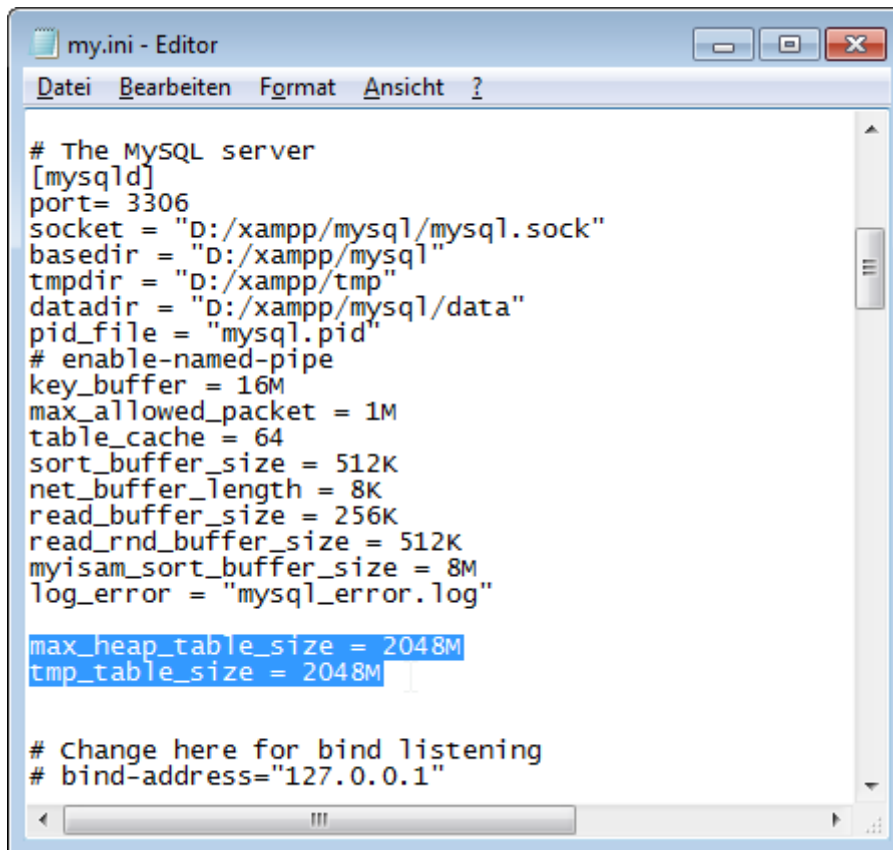

append

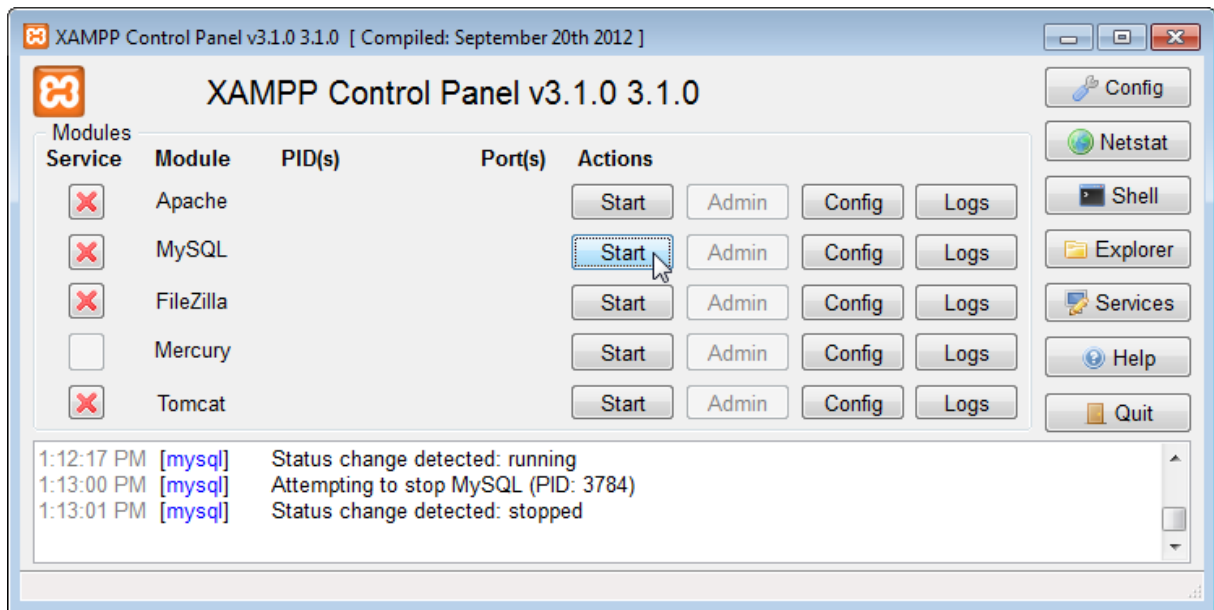

max_heap_table_size=2048M

tmp_tables_size=2048M

to the [mysqld] section as shown.

Save my.ini file, then start MySQL Server

now you can use it with ISOQuant.
